SUMMARY

Passionate Android Developer and AIML student with hands-on experience building Android applications using Kotlin, Jetpack Compose, Firebase, Room Database, and REST APIs. Interested in mobile development, UI/UX design, and AI-powered applications.

TECHNICAL SKILLS

Kotlin	Jetpack Compose	Firebase	MVVM Architecture	Figma
Python	XML	Room Database	Coroutines	UI/UX Design
Dart	Flutter	REST APIs	Git & GitHub	Android Studio

PROJECTS

TrenNex - E-Commerce Android App | [GitHub](#)

- TrenNex is a modern e-commerce Android application developed using Kotlin and XML, focused on creating a smooth and user-friendly shopping experience.
- The app features OTP-based login UI, dynamic product browsing, Location Handling and more.

TrenNex UI/UX Design | [GitHub](#)

- The UI/UX of TrenNex is designed with a modern, clean, and interactive shopping experience in mind.
- The application follows a minimal yet visually appealing design system inspired by leading e-commerce platforms while maintaining its own unique identity and smooth user flow.

AI Expense Tracker | [GitHub](#)

- AI Expense Tracker is a Jetpack Compose Android app for tracking expenses, budgets, analytics, recurring payments, and AI-powered categorization.
- It uses Room for offline storage and cloud sync, and multi-device backup.

EDUCATION

Bachelor of Science in Computer Science & Engineering (AIML)

- G.H Raison College Of Engineering And Management, Jalgaon
- Expected: 2027**

Diploma in Computer Engineering

- KCE Society College of Engineering and Management, Jalgaon
- Graduated: 2024**

ADDITIONAL INFORMATION

- Languages:** English, Hindi, Marathi
- Certifications:** Android Development, Kotlin, Figma, Firebase
- Acheivements:** Participated in Hackathons, solving DSA problems
